MERN ASSIGNMENT
Client Contact - Needs Survey(GG)

09 July 2019 / Matthew Leacy

AGENDA

- Form a list of needs Greenheart Games(GG) would need if they were to be our client.

NOTES

- GG wants a Discord bot that would help foster a creative and supportive community.

- The bot would read community member interactions on the server and award points for positive engagement.

- GG wants some kind of system to limit the ability to game the bot.

- Data needs to persist and they require admin access to a front end for the database and bot activity.

ACTION ITEMS

1. **Further discussion with team required before making final decision on client choice.**
2. Formulate project plan and pitch based on client needs.
